Rate Information:	The annual percentage yield (APY) is a percentage rate that reflects the total amount of dividends to be paid on an account based on the dividend rate and frequency of compounding for an annual period. The interest rate is the rate at which interest is paid on the principal balance of the account. TruMark Financial® reserves the right to change the dividend rate, APY, or interest rate at any time, as determined by TruMark Financial. The rates and fees appearing with this Disclosure are accurate as of the last dividend declaration date indicated herein. Accrual of Dividends:	Dividends will begin to accrue on the business day you deposit non-cash items (e.g. checks) to your account. If you close your account before accrued dividends are credited, you will be paid closing dividends calculated by the number of days in the dividend period the account is opened.
Balance Computation Method:	TruMark Financial uses the daily balance method to compute dividends/interest on all accounts. The daily balance method applies a daily periodic rate to the principal in the account daily.
Par Value:	The par value of a regular share in this Credit Union is \$5. A member who fails to maintain a share balance of at least par value may be terminated from membership.
